

Prologue: The conditions on Earth are serious, they began to threaten human existence; the main reason may be human dreams of an Utopia.

Russian International Affairs Council

Sponsored · 

#Humanity is still aiming towards a future utopia, an ideal world in which the problems of resource requirements have been solved, conflicts have been eliminated, equality among people has been attained and the environment is clean. In an incredibly technologized society, we continue to dream of "paradise". Today, we are witnessing a clash of two different concepts of "paradise" — the rationalist and the religious. We have reached a stage of human development where progress has ceased to be a universal value and the ideology of the Enlightenment is in crisis. "Paradise" remains excruciatingly out of reach.

"#Russia and the #World: The Agenda for the Next 100 Years" by Иван Тимофеев (Ivan Timofeev)

What Manly P. Hall points out below is of ultimate importance, science and theology need an handshake.

archetype of morality given by the great Gautama, or one of the other Buddhas. All doctrines which seek to unfold and preserve that invisible spark in man named Spirit, are said to be spiritual. Those which ignore this invisible element and concentrate entirely upon the visible are said to be material. There is in religion a wonderful point of balance, where the materialist and spiritist meet on the plane of logic and reason. Science and theology are two ends of a single truth, but the world will never receive the full benefit of their investigations until they have made peace with each other, and labour hand in hand for the accomplishment of the great work - the liberation of spirit and intelligence from the three-dimensional prison-house of ignorance, superstition, and fear. That which gives man a knowledge of himself can be inspired only by the Self - and God is the Self in all things. In truth, He is the inspiration and the thing inspired. It

Freemasonry needs to be the 3rd of the handshakers, its place is indispensable. Everything it holds at hand, with the exception of recognition mode of course, should immediately be opened to scientists and theologians. Though the author is not a registered freemason, this work tries to bring some water to the mill. I hope it will be of some use in initiating the desired result.

Considerations and Thoughts on Science vs. Intelligent Design

İsmail German, PhD, retired research fellow, isoger1@gmail.com

Abstract: Under recent conditions mankind should try to find a solution to the global problems, if of course is possible at all. Humans seem to be in an excited state, most of us singing his own song. As a result, the ground state may come back, we may be forced to extinction, or the religious predictions may get realized. We are not sure.

In this work it has been tried to show that we are created by an extremely powerfull E.T. Creator located in Orion, via a synthesis of scientific facts, masonic symbols and historical evidences. It has been shown that some of the main symbols has correspondence with scientific facts and geometry of some sites.

Enoch-Hermes distinction is also given a try.

1. Introduction/Problem Definition

Today's men are living in a highly developed society as a result of a pretty long past on this planet, the whole world is almost connected and daily consumption is worth of 100 billions of dollars [1]. The amount of waste is huge, volume of plastics in oceans is expected to be greater than the volume of fish in them in a couple of decades. Of course all value spent daily is not wasted much worth is also produced. In spite of a long past, connectivity and this immense production the old questions regarding the structure of the matter&energy, and the meaning of life and its debated origin(s) are still actual. We still do not know, at the least, what dark matter is (New Scientist/Feature/6 December 2017) and if we are created or evolved naturally [2].

New measurements of how fast the universe is expanding suggest that we are wrong about a key characteristic of dark energy, and we can ignore it no longer. Something is tearing everything apart even faster than we thought – and not even atoms will survive, never mind our picture of how the universe evolved.

Figure 1. The matter is to disperse and this is to be expected in our way of handling natural phenomena basically expressed in [3].

In a sense we all are bewildered and the reason of our bewilderment is almost obvious: Science, being the son of logic not alone but together with logic, has mostly been in conflict with religion. We could never manage to bring these two collarettes together and button them up. What is said to have been relieved to us is at odds with our logic and the reason may well be an interpretation problem from our side. From the Heavens side it may also be done on purpose, since the fact is that the totality of all revealed has not been enough for us to understand the situation.

In pseudo parenthesis, as it will soon be explained, Heavens may be the father of science that has lately turned out to be pseudo-science by the way.

Belief side of religion is almost equivalent to creatinism which is defined as "Creationism, the belief that the universe and the various forms of life were created by God out of nothing (ex nihilo)." In this context, logic whispers to us that a power capable to this, could also create all in the existing form. But our observations on Earth are in direction of evolution. This is the principal debate among different cultures of the day, this is the principal debate between science and religion. The followings are additionally to be considered:

- The God is somehow accepted to be omnipotent, omnipresent and omniscient in the strong

sense. There the logic opposes. In order to be, for example, strong omniscient, a body is supposed to be the totality of everything in the Universe, every part of it should be conscious and there should be instant communication between every part. In a material Universe in 3(+1) dimensions, this is certainly impossible. Only omniscience regarding a subset may be accepted and even this requires information on the speed of transfer of information, possibility of knowledge via simulation and control loops.

Events we have observed have lead us to speak of higher dimensions but this may as well be due to our lack of understanding.

Omnipresence would require to be the universal set, Universe's self in our case, which does not seem to be the case. Being a subset excludes omnipotence, due to the velocity limit on material bodies. So should be the situation regarding the creation of the Universe, an infinity can not be created from inside and there can be nothing outside.

Omnipotence would require the presence of bot mentioned previously, and probably a good deal more.

- There are a lot of observed phenomena, and certain features of the universe and of living things can hardly be explained via sole evolution. Honey bee and its waggle dance may be a good example [4].
- A gnu would not certainly evolve to a lion. Gnu and lion together help each other's evolution and health. On the other hand, a totally evolving human habitat would not come to a point of self destruction. To reach destruction via evolution should, or at the least seems to, be self contradictory.
- Some excellent scientists like Feynman and a good deal of normal folks claim God and evolution may be consistent. This statement is based on the observation that there are a good deal of excellent scientists who are also believers. To our mind this is not a sound claim, the observation does not necessarily imply the claim. They may be the kind of people healthily handling their schizophrenia, their divided mind.
- Considering an alternative explanation, the ID theory we can not overcome the bewilderment. The basic observation, observed evolution, excludes Creationism and the form of Intelligent Design described in [5]: "Intelligent design (ID), argument intended to demonstrate that living organisms were created in more or less their present forms by an "intelligent designer." The people supporting ID might be totally correct if they had been careful enough and observed creation requires concept design, concept improvement and implementation; design phase may be separated from implementation.
- The ID web page states "The theory of intelligent design holds that certain features of the universe and of living things are best explained by an intelligent cause, not an undirected process such as natural selection." Here is to be noted that the Universe is too big a fish [6].
- The following figure requires also questioning of both Creationism and Intelligent Design. The picture implies a good and perfect designer, as God is supposed to be, would not design life this way.

Figure 2. Observed very probably off-design events. It seems to be the case that stochastic base of nature is at work even if Creationism or ID is the case.

- The script below, from Wikipedia, states Universe and life could not be a result of natural selection and the processes leading to them are to be designed by an Intelligent Designer. Again the Universe is too big a fish.
- Classifying religious beliefs as theism, deism, pantheism, panentheism and atheism it is easy to determine where creationist should stay: Theism and deism. As a result of all statements cited above, it seems pretty hard to determine the place of ID.

Here a need arises, probably it should be said that what we really consider as God is not God, but the image of God in human mind. They may be different since the human mind, brain, is much more curved than the Universe and prefers occasional short cuts. That statement needs further justification and, to this end, we are rather to go bottom up, instead of top down; we are to use the evidences we have at hand, and to a certain extent we have done it; we tried to find scientific evidences.

Within this bewilderment we have looked for life and and ET intelligence in space. Regarding life ESA have located life supporting molecules in Orion/Horsehead and regarding ET intelligence we have found nothing conclusive up to now, in spite of the fact that its evidence may be nearer than we have thought of: Holy Quran / 32:5 and 3:133

Figure 3. Only approximately measurable data related to Orion. The average distance to the Belt Stars is really 1000 l.y. If we consider Bellatrix out of Heaven (inside Orion), the depth is almost equal to the distance to Earth. This is also justified by the statement "Bellatrix was once thought to belong to the Orion OB1 Association of stars that share a common motion through space, along with the "Orion's Belt" stars([Alnitak](#), [Alnilam](#) and [Mintaka](#)). However, this is no longer believed to be the case, as Gamma Orionis is now known to be much closer than the rest of the group." [7].

This means alone that E.T. Life exists for almost certain, with an approximate probability of over 92.5 %. The answer to the remaining question then if He, the aforementioned ET source, really is our Creator will in the followings be given a try. The method will be evidence based thinking.

2. Evidences

2.1. Religions

The known history of humanity is almost equal to the known history of religions. The number of

believers still exceeds the number of the others. The believers, being no stupid, may have their reason. We will not say more on the subject since it is pretty well documented.

2.2. Freemasonry

Another evidence is Freemasonry, a social institution. Within this regard, the followings are to be considered:

- Its history is not well known, it didn't take its place in ordinary history.

worthy, it is worth stressing the obvious: that masonic history should follow the rules accepted for other branches of history. As the outstanding twentieth-century historians of early **freemasonry**, Knoop and Jones, wrote in 1946,

whereas it has been customary to think of masonic history as something entirely apart from ordinary history, and as calling for, and justifying, special treatment, we think of it as a branch of **social** history, as the study of a particular **social institution** and of the ideas underlying that **institution**, to be investigated and written in exactly the same way as the history of other **social** institutions.⁴

Unfortunately these sentiments have failed to free masonic history from the ghetto to which it has all too often been consigned by the narrow historical outlook of many masons combined with the unreasoning prejudice of professional historians. Knoop and Jones themselves failed to provide a properly balanced approach to masonic history, for it should not be seen as a

Figure 4. The properties of masonic history.

- It's defined to be a science taching via symbols.

www.sacred-texts.com/mas/sof/sof03.htm

I. Preliminary. The Origin and Progress of Freemasonry.

The definition of Freemasonry that it is "a science of morality, veiled in allegory, and illustrated by symbols," has been so often quoted, that, were it not for its beauty, it would become wearisome. But this definition contains the exact principle that has just been enunciated. Freemasonry is a science--a philosophy--a system of doctrines which is taught, in a manner peculiar to itself, by allegories and symbols. This is its internal character. Its ceremonies are external additions, which affect not its substance.

Figure 5. The nature of freemasonry.

- It searches for once known, meanwhile lost divine truth.

www.sacred-texts.com/mas/sof/sof03.htm

XXXI. The Lost Word.

Now, this idea of a search after truth forms so prominent a part of the whole science of Freemasonry, that I conceive no better or more comprehensive answer could be given to the question, What is Freemasonry? than to say that it is a science which is engaged in the search after divine truth.

....

This symbolism may be interpreted, either in an application to a general or to a special sense.

The general application will embrace the whole history of Freemasonry, from its inception to its consummation. The search after the Word is an epitome of the intellectual and religious progress of the order, from the period when, by the dispersion at Babel, the multitudes were enshrouded in the profundity of a moral darkness where truth was apparently forever extinguished. The true name of God was lost; his true nature was not understood; the divine lessons imparted by our father Noah were no longer remembered; the ancient traditions were now corrupted; the ancient symbols were perverted. Truth was buried beneath the rubbish of Sabaism, and the idolatrous adoration of the sun and stars had taken the place of the olden worship of the true God. A moral darkness was now spread over the face of the earth, as a dense, impenetrable cloud, which obstructed the rays of the spiritual sun, and covered the people as with a gloomy pall of intellectual night.

- It tries to learn via establishing contact with higher Worlds.

Figure 6. The secret

- It played a pretty important role in the birth of modern science, a kind of Messiah under the cited conditions in the following figure.

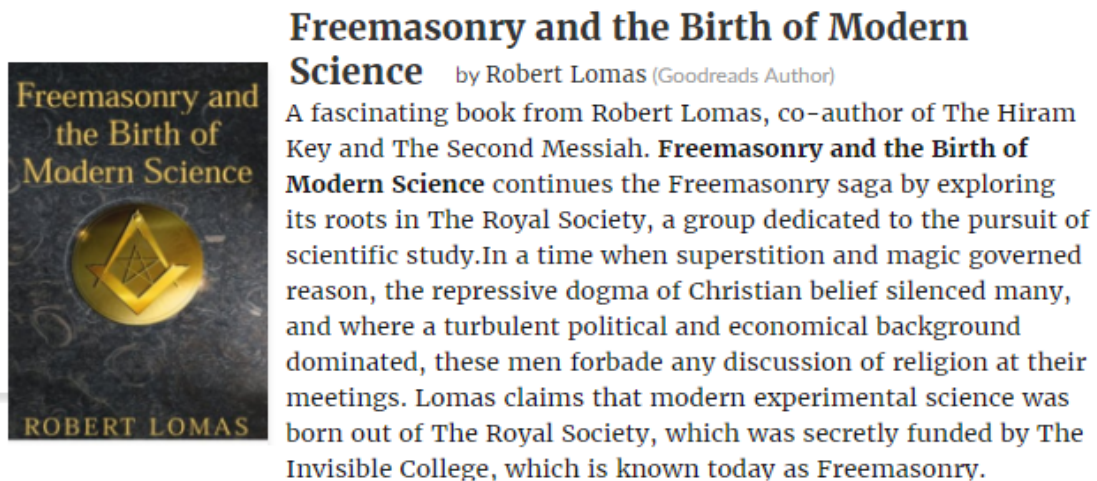

Figure 7. The necessity of pursuing science under hard conditions lead to the method followed.

The origins of Freemasonry may go back to Noah or even Enoch. It may also little bit younger considering the masonic age coincident with Julian Calendar. The history is not well known till the foundation of modern Freemasonry at the beginning of 18. Century. The number of freemasons from this date up may be guessed to be around 10 millions. They were no stupid, they should have found something in this institution and only two of them seem to have partly revealed: Wolfgang Amadeus Mozart and Captain William Morgan.

Within the time, the institution got pretty open day by day but reticence is still with it. The reason of this reticence may not be being after wealth. Nor it may be fear of being killed. 10 million is a pretty big number, the population should be diverse. This fact certainly increases our old probability over 95 %.

Again in pseudo parenthesis, it is to be mentioned that the author feels himself a perfect, though not

registered, mason as far as search for divine truth and universal love are concerned, he spent a life for both. Many times he got invitations to be a registered one. Discretion and advices of experienced masons have prohibited the acceptance of the offers. It will be investigated in the following sections and conceived, that Freemasonry seems to be regarding GAOTU to have only a name and a vague location at the most. The correct regard, according to the author, requires knowledge of a minimum number of adjectives that could be satisfactory to understand Him. These adjectives should conduct how He is to behave. Obviously he would not be satisfied if accepted the offers.

3. Considerations from History

In this section the method will again be evidence based thinking. The fuzzy and pretty well known histories will be considered, and the possible effects of historical events on the established probability will be evaluated.

3.1. Fuzzy History.

3.1.1. Adam

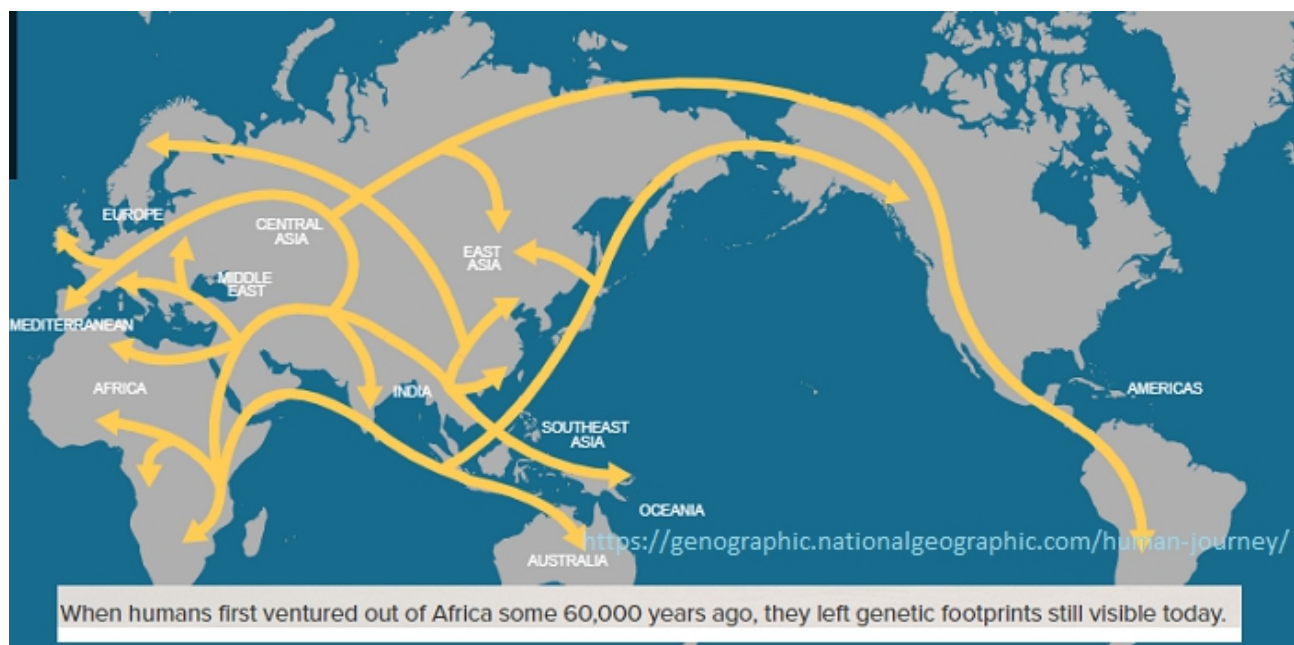

Figure 8. Human migration paths.

From genetic research we pretty well know human history on Earth. We are unfortunately unable to place Adam at any one of the nodes on the figure given above. Another figure gives the approximate dates of the nodes, but again no identifiable node for Adam, He probably has never existed as the recent Pope claims [8].

This seems to be justified if Quran is read carefully, it separates the concept, concept development and practical implementation phases:

- In 7:11 concept creation (haleknakum) and concept development (savvernakum) are mentioned.
- 21:30 clearly dictates that every living thing is created (cealnakum) from water, which is the practical implementation.
- 7:189 says "It is He who "created" you from one soul and "created" from it its mate ..." and the associated Arabic word with the first is "haleknaküm" which refers to concept phase. The second is "ceale" which refers to practical implementation but the distinction is not clear.

- 2:30 says “Indeed, I will make upon the earth a successive...” and in 2:31 Adam is already there though no implementation has happened. From these it may be deduced that Adam is the name of the concept or spirit. Nowhere is said that Adam has been sent to Earth, only the humans are mentioned as sons of Adam.

The 21:30 also to some extent implies that Earth came to its present location from Orion. Some semi-scientific claims exist in this direction and it is quite logical since high in the Orion Arm activity level is surely much higher, and protection of organic life from this activity would be harder.

Regarding this era we need to mention that the oldest image of a star pattern, that of the famous constellation of Orion, has been recognised on an ivory tablet some 32,500 years old [9].

A sole mention of shamanism a brief history of which is given in [10]. It is quite interesting from two points:

- It somehow weakly implies the existence of higher worlds since it is based on contact with higher worlds.
- The way some forms of it defines the deity as a great spirit is interesting.

It should be accepted that nothing conclusive is obtained via these weak evidences. As a conclusion it will be proper not to make any increase or decrease of probability based on these.

3.1.2. Idris

Idris is mentioned in Quran (19:56) and as Enoch in the Old Testament (5:23). In both he is said to be raised to a high location. This information is not based on evidence, known/detected evidence.

Information on Book of Enoch is given in but meanwhile the book may have been changed [11].

An approximate date for his presence on Earth may be 15 000-14 000 B.C. A page in Mimar Sinan Dergisi Nr.:143 (in Turkish) gives it as 14 000 B.C., with the assumption that Hermes and Enoch are identical.

[3] Hermes Öğretisi (Memfis)	[2] MÖ 14 000 – 385	Piramitlerde Rahiplere 8- aşamalı tekris Romalı Theodosius Memfisi yıktı yaktı (MÖ 385).
-----------------------------------	-----------------------	--

Figure 9. Date of Idris' presence.

Much better information is to be obtained via [12].

Some excerpts from the just above mentioned reference are repeated below:

- Enoch was believed to have hidden the wisdom of the pre-flood world that he had accumulated, and then he buried it on Mt. Moriah. Why is Mt. Moriah so significant? Because this the spot where King Solomon's Temple was built. Enoch also buried a triangular shaped object that contained the name of God on it.
- Enoch, being inspired by the Most High, and in obedience to a vision, constructed underground, in the bosom of Mount Moriah, an edifice consisting of nine brick vaults situated perpendicularly beneath each other and communicating by apertures left in the arch of each vault.
- He then caused a triangular plate of gold to be made, each side of which was a cubit long; he enriched it with the most precious stones and engraved upon it the ineffable name of God.
- Enoch himself was not permitted to enter it more than once a year, and on his death or translation all knowledge of this building and of the sacred treasure which it contained was lost until in succeeding ages it was accidentally discovered while Solomon was engaged in building, a temple above the spot, on the same mountain.

Figure 10. The symbols, where GAOTU is placed and His location according to Quran.

- The Legend proceeds to inform us that after Enoch had finished the construction of the nine vaults, fearing that the principles of the arts and sciences which he had assiduously cultivated would be lost in that universal deluge of which he had received a prophetic vision, he erected above-ground two pillars, one of marble, to withstand the destructive influences of foe, and one of brass, to resist the action of water on the pillar of brass he engraved the history of the creation, the principles of the arts and sciences, and the doctrines of Speculative Masonry as they were then practiced; ...
- When detailing the events that occurred while Julian the Apostate was making his attempt to rebuild the Temple of Jerusalem, he narrates the following fable, but of whose fabulous character the too credulous monk has not the slightest notion.
 "When the foundations were being laid, as has been said, one of the stones attached to the lowest part of the foundation was removed from its place and showed the mouth of a cavern which had been cut out of the rock. But as the cave could not be distinctly seen, those who had charge of the work, wishing to explore it, that they might be better acquainted with the place, sent one of the workmen down tied to a long rope. When he got to the bottom he found water up to his legs. Searching the cavern on every side, he found by touching with his hands that it was of a quadrangular form. When he was returning to the mouth, he discovered a certain pillar standing up scarcely above the water. Feeling with his hand, he found a little book placed upon it, and wrapped up in very fine and clean linen. Taking possession of it, he gave the signal with the rope that those who had sent him down, should draw him up. Being received above, as soon as the book was shown all were struck with astonishment, especially as it appeared untouched and fresh notwithstanding that it had been found in so dismal and dark a place. But when the book was unfolded, not only the Jews but the Greeks were astounded. For even at the beginning it declared in large letters: IN THE BEGINNING WAS THE WORD WITH GOD, AND THE WORD WAS GOD. To speak plainly, the writing embraced the whole Gospel which was announced in the Divine tongue of the Virgin disciple."
 It is true that Enoch has been supposed to have been identical with Hermes, and Kerihher says, in the Oedipus Egyptiacus, Idris among the Hebrews, has been called Enoch, among the Egyptians Osiris and Hermes, and he was the first who before the Flood had any knowledge of astronomy and geometry.

If one could be sure about the truth of this legend, it would immediately follow that we are created by the deity mentioned. It is unfortunately not possible to be sure of the percentage of truth in the legend. Again no increase or decrease of our aforementioned probability but Göbeklitepe has proven that stone cutting, operative masonry was performed prior to 10500 B.C. Probably much more, as it will be seen in the followings.

3.1.3. Göbeklitepe

We will first make mention of two references about Noah's flood:

- To the question of reality of the flood, some clues are given in [13]. This reference also cites that

flood stories in the broadest sense have been documented in Mesopotamia, Egypt, Greece, Syria, Europe, India, New Guinea, Central America, North America, Australia and South America.

- More details are to be found in [14]. The name of the people/countries are cited as: Sumerian, Babylonian (Epic of Gilgamesh), Akkadian (Atrahasis Epic), China, Andaman Islands, India, Indonesia, Polynesia, Australia and New Zealand, Greek, Germanic, Irish, Aztec, Inca, Maya, Hopi, Cado, Menominie.

Four of them are especially of interest since they to some extent support our next to be given thesis:

1. (China) The text of Shiji, Chuci, [Liezhi](#), Huainanzi, Shuowen Jiezi, Siku Quanshu, Songsi Dashu, and others, as well as many folk myths, all contain references to a personage named Nüwa. Despite the similarity of her name to the biblical Noah, Nüwa is generally represented as a female who repairs the broken heavens after a great flood or other calamity, and repopulates the world with people.
2. (Polynesia) In [Hawaii](#), a human couple, Nu'u and Lili-noe, survived a flood on top of Mauna Kea on the Big Island. Nu'u made sacrifices to the [moon](#), to whom he mistakenly attributed his safety. Kāne, the creator god, descended to earth on a rainbow, explained Nu'u's mistake, and accepted his sacrifice.
3. (Greek) [Plato](#) in his Laws, Book III, estimates that this flood occurred 10,000 years before his time.
4. (Hopi) The people traveled on in their canoes, guided by their inner wisdom (which is said to come from Sotuknang through the door at the top of their head). They traveled to the northeast, passing progressively larger islands, until they came to the Fourth World, a great land mass. The islands then sank into the ocean.

We have published our understanding of Göbeklitepe in [15]. Briefly said, our claim was that the burial of the site was due to penitence after a worship of a false deity. The people survived the flood, and as a result they performed the work of a million man x year to prevent rebirth of worship of the false deity. After this work we have had an opportunity to have a look at [16] and [17].

Integrating all, we feel free to speculate the followings:

- The site is certainly an old temple, even if it may not be the first.
- The site is at the old bed of Euphrates and it is the site of beginning of the globally mentioned flood, towards the end of melting of glaciers at about 10 500 B.C., that had affected a great deal of Mesopotamia.
- Reference to stars and star groups is quite possible. If true, this somehow implies existence of a previous “Enoch”.

3.1.3.1. Correlation with Hopi

Figure 11. Location of Hopi settlements and Orion.

We took the followings from [18]: “The Hopi migrated all over the Southwest and after a series of

building villages and abandoning them, they came to these three primary mesas in Northern Arizona. They call them first, second and third mesas. The Hopi mesas shape Orion's Belt image and it is said that the Hopi specifically came here because of the shape, so we know for sure that the Hopi were extremely interested in Orion's Belt and for them this was the center of their universe. They have said it is a place where they can make contact with the gods and according to some researchers, not only do the three mesas represent the stars in Orion's Belt, but when connected to other Hopi landmarks throughout the Southwest, the collective sites map the entire body of the Orion constellation.

Giza. Teotihuacán. Nabta Playa. Black Mesa. Could these ancient monuments, all aligned to the stars of Orion, really be linked to each other, providing clues to our celestial beginnings? Considering the Orion Nebula is a nursery of stars, is it possible the belt stars of Orion literally mark the spot in the galaxy where all life on Earth began?"

Figure 12. Not only Hopis but ancient humans seem to have chosen an Orion Belt Stars similar settlements. Figure shows Urfa-Göbeklitepe-Nevalı Çori triangle. Note the almost equilateral triangle pointed to with an arrow. The location is named “maşuk” which means “beloved/?God?”

Before we continue our unavoidable speculation we need to point two facts out:

- We are able to obtain information from the peaks, from the crest. According to Nyquist we need a sampling twice the highest frequency to reconstruct. Below this rate our sampling is undersampling; we are to speculate, and we need extreme care.
- Science and wisdom differ to some extent. Wisdom is, in a sense, top-down. It is in essence a gift, it develops via inductive reasoning based on that revealed from Heavens. Science on the other hand is bottom-up. It is based on experiments and deduction via the results of the experiments. Science could not attain the ultimate success due to undersampling, and wisdom is twisted on the way top-down.

Within the restrictions of that above said, we further speculate and obtain the followings:

- Orion map on mammoth tusk indicates, 30 000 B.C., considering all other following Orion references, a possible Creator located in Orion has informed the early human inhabitants on Earth via unknown/undetectable means. That is probably why the early immigrants to New Continent speak of Manitoo, the Great Spirit. Shamanism, trials of connection to higher worlds may also have begun within this era because early inhabitants do also practice it.

- With Enoch much more information seems to have been obtained. Stone cutting must have begun as Göbeklitepe indicates.
Enoch must not be associated with Hermes, Hermes has brought much more.
- Hopis are late immigrants as their location indicates. Since they do also know of deluge, they must have immigrated at about 10500-10000 B.C., just before some of the islands on Bering Strait covered with water. Their myths seems to have been a changed form of Enoch's teachings.
- According to Enoch's teachings the Crator seems to be located in Orion, at a location a great deal of masonic symbols also indicate. He is not a star of the mentioned location though. This seems to be known by Hopi.
- Shamanic tradion has continued and other sources began to get included in the higher-worlds-contacts through which the worshipped deity has been changed, especially around Göbeklitepe. The result was a punishment by the Creator.
- Hawaian myth supports this, since masculine deities are normally to be associated with Osiris (Orion), whreas feminines are to be associated with Isis (Sirius). Moon is feminine. Same is the situaion in New Scientist article.

So can be all of the sampled data explained. Oher explantions may also be valid. It is also to be noted that auxiliary deity worship could not have begun without the permission of the Creator who seems to be involved in earthly affairs.

As just a clue to His power, it is also to be noted that He also seems to foreknow what will happen on Earth. Via some means He may also have the power to fine-tune.

We hereby used the name "Creator" on purpose and felt free to increase His probability of existence by 1 % up to 96 %.

3.1.5. Hermes

There seems to be three appearingly distinct characters in Human history that may in reality be identical: Harut-Marut (Fallen Angels), Zaroaster (the First) and Hermes.

Fallen Angels are not mentioned directly in Bible but indirect associations are present:

- "The Bible teaches that fallen angels are invisible, supernatural, angelic, spirits created by God. Satan employs them as his immoral agents. After one-third of the heavenly angels sided with Satan, they were cast out of heaven to the earth ([Revelation 12:4](#))." [19].
- A reference claims they are the angels that are followers of Lucifer (meaning "light-bearer", referred to as the "morning star.") [20].

There is some mixed folklore:

- Anothe one conducts a myth about them. Translated in brief, they are angels sent to Earth because of the claim that the angels would not commit humanly sins. Equipped with human affections two chosen of them are chosen and sent down to Earth. They fall in love with a woman named "Zuhre" (again Morningstar, Lucifer) and as a result they commit a good deal of sins. They teach the woman the ineffable name of God, The woman ascends to sky and becomes a star. The fallen angels are lightly punished, having asked for amnesty via Enoch [21].

The characters in this legend are obviously masonic since the angels kill the woman's husband and she becomes widow; Zuhre is Eastern Star; and Enoch is accepted to some extent as founder of Masonry/stone working.

It is to be noted that the good and the bad are mixed/together.

The Quran mentions them as angels, Harut and Marut of Babylon in 2:102. It needs to briefly mention that

- Babylon is "Gate to God(s)" as seen in many references including [22]
- It is also referred to be "Gate to Ilim" [Gate to (wisdom of) God].
- It's known history goes back to circa 2000 B.C., but an unknown part of human presence

there, that began about 3000 years earlier than this date is also estimated to be possible. It sits on a node of anatomically modern human migrations [23]

If all of these claims have a part of truth, then they could be some kind of E.T. bodies that have brought at their time unknown divine knowledge to Earth that has or has been changed to evil within time,

Remnants of these two names are still with us:

- Their names are still in Myths of India as semi-extra-terrestrial beings.
- Wind deity of (old) India carries name of one of them.
- Harut, Marut, Harutyun (son of Harut), Marutyun (son of Marut), Harutyun (Genesis) are still being used by Armenians as names or surnames.
- They are said to be “of Babylon” from where script seems to have emerged. Babylon may also be the location where Zoroaster the 1st has spent his time.

It is to be noted that the emergence date of script is about 4500 B.C. Based on Klaus Schmidt's words. He is said to have said regarding Göbeklitepe “We’re 6,000 years before the invention of writing here,” in [24].

3.1.6. Zoroaster

As it is said in Middle-East, Zartosht, the synonyms of the name may be brilliant star, scorching star, yellow (golden) radiance, camel owner, yellow camel owner.

Without “t” in the middle it could mean yellow (golden) star.

Another way of saying the name is “Zar-a-ustra” which would also mean golden star without the “a” in the middle.

Za-rath-ush-tra would mean vehicle bringing heavenly light and zor-de-ustra would mean golden man from the stars.

Zerdüşť adı, **Zara-o-ster** yani **altın ışığın çocuđu** kavramlaştırmasına dayanır. **Yıldızın çocuđu** anlamı da geçerli olabilir.

Tam adı **Zer-deşt-ra-spi-tma** olan Kürtçe’de **zer: sarı** **deşt:(ova)** tréj-keskin ışın-**ra: (-e hali)-** **spi:beyaz** **tma: bize** veren bizi ışınlayan bize yayılan anlamını taşımaktadır.

Figure 13. Meanings associated with Zoroaster.

The source of the previous picture translates the name as child of golden radiance or child of star. The name seems to indicate that he is an E.T. being.

Regarding symbolism we find the following pictures:

Figure 14. Some symbols from Zoroastrianism.

Both Harut-Marut and Zoroaster are claimed to be inventors of magic, the first by Kuran and the second by <https://en.wikipedia.org/wiki/Zoroaster>. Regarding the time of their presence;

- regarding Harut-Marut there is no information,
- regarding Zoroaster the 1st narratives are sundry. The followings cite some dates, but if the average of cited dates is taken, the real date may well be around 5000 B.C. [25] and [26]. Davies claims magic may well go back to the time of Noah and even Enoch which seems to be extreme unless with restriction in scope. Trials to find ways to connect with higher worlds may well go back to Enoch and even beyond. The modern scope is given in Britannica and it should be eventually built up [27].

3.1.7. Hermes Trismegistus

The ancient Greeks identified their god Hermes with the Egyptian Thoth and gave him the epithet Trismegistus [28].

Hermes Trismegistus (Greek for "Hermes the thrice-greatest" or Mercurius ter Maximus in Latin, is the syncretism of the Greek god Hermes and the Egyptian Thoth. In Hellenistic Egypt, the god Hermes was given as epithet the Greek name of Thoth. He has also been identified with Enoch. Other similar syncretized gods include Serapis and Hermanubis.

Hermes Trismegistus might also be explained in Euhemerist fashion as a man who was the son of the god, and in the Kabbalistic tradition that was inherited by the Renaissance, it could be imagined that such a personage had been contemporary with Moses, communicating to a line of adepts a parallel wisdom. A historian, however, would leave such speculation to the history of alchemy and the nineteenth-century history of occultism.

Both Thoth and Hermes were gods of writing and of magic in their respective cultures. Thus the Greek god of interpretive communication was combined with the Egyptian god of wisdom as a patron of astrology and alchemy. In addition, both gods were psychopomps, guiding souls to the afterlife [29].

Thoth Hermes Trismegistus is portrayed by the Egyptians as the moon god with the body of a man, head of an ibis, and a crescent moon over his head. His symbol was the winged serpent staff. He was the god of wisdom, letters, and time [30] and [31].

It may be deduced from 3.1.5, 3.1.6 and what is given just above that the mentioned characters are the same, i.e. FallenAngels, Zoroaster and Hermes are all one. **Speculative Masonry** has its roots in their closed techings and Zoroastrianism in their open. The reasons are given below:

- Masonic date and the beginning of Julian Calendar is 4713 B.C. Zoroaster the 1st seems to have been on Earth simultaneously.
- Both Masonry and Magic is traced back to Hermes, whereas Magic is also traced back to Zoroaster.
- Magic is also traced back to Babylon (neighborhood) where Zoroaster the 1st is claimed to have been.
- Masonry and Zoroastrianism do have a good deal of common beliefs and symbols.
- The Magic Flute is masonic and Zoroaster is therein (Sarastra).
- Script is dated back to the previously mentioned date and there are evidences that it has been taught by E.T. beings.

Figure 15. Marduk may have been a derivative of Marut.

As a conclusion after these 3 sections no probability increase will be made since conclusive evidences fail. Considering all up from Idris together, it may be claimed that Masonry was aware of existence of GAOTU located in Orion, the symbols plus that has been said in Quran are evidence enough.

3.1.8. Nimrod

From what we have conducted up to now to probably deduce is that there may be a Creator located in Orion, not any visible object like stars, but an invisible one. The people may have worshipped him, and that is probably what the 32000 years old mammoth tusk indicates. So may be the Great Spirit Manitoo of Indians and so should be in the case of ancient Turks.

That is not the case, something should have been changed on the way as the case in Göbeklitepe seems to indicate. The people of the region is claimed to be worshipping the Dog Star, at the date of destruction at the least [32] and [33]. This may well be the reason of burial of the site [15]. A sudden rise of a bright star on horizon may explain the reason of worship in Göbeklitepe, but how to explain such a worship in case of old Turks? Let us first introduce the case.

The worship is mentioned in the given ref. and the figure below indicates it [34].

The name of the deity in Turkish is Tanrı which consists of two syllables: Tan-Rı. “Tan” means dawn and “rı” means light as the corresponding word in Chinese, Tien-Shan, indicates.

Figure 16. Sirius worship of Turks.

The Alevite Turks do still worship Sirius as the following figure indicates. Alevism is a cocktail of Islam and Zoroastrianism, and Zöhre Ana is best described in [35]. Under Venus is Sirius to be understood since Venus is described as morning star, and the real morning star is named Sirius.

Figure 17. Sirius worship of Alevites.

Orion and Sirius are dominantly worshipped locations by many many groups of people on Earth. The reason why Orion, and stars of Orion are worshipped is to be understood considering the aforementioned mammoth tusk and Idris, somehow the location of the Creator seems to have been revealed to humans; this is also done by Quran in a very peculiar way.

If nothing is visible at the given location, humans may select the nearest visibles as deities a while after the teachings of any real prophet.

As the time goes on people may choose the nearest star on which life depends, Sun, as deity. This is certainly plausible. It is hard to understand the case of Sirius. It may be the brightest star in the Earth's night sky but the day is much brighter.

We know the name of Orion is derived from Uri-Anna that means Heaven's light. Orion is indicated as Heaven by the Great Pyramid and many other locations on Earth [36]. Orion is also named the Great Hunter.

Returning to Nimrod, he has no place in normal history, all said about him seems to be without evidence. He is said to be a grand master and even a cofounder of Masonry and to have made changes in rituals. He is also said to be a rebel. No need to speculate on such claims lacking evidences, but two of will is given in the figure below as samples.

That **Nimrod** was not only an Hunter of the bodies of men to make them subjects, as tyrant, but of their souls, in order that they might worship him as God, is very apparent from all that tradition has preserved concerning him. “**Nimrod** (saith :³⁰⁷ Josephus) persuaded mankind not to ascribe their happiness unto God, but to think that his own excellency was the source of it. And he soon changed things into a tyranny, thinking there was no other way to wean men from the fear of God, than by making them rely upon his own power.” “**Nimrod**, says Jonathan³⁰⁸ ben Uzziel, was a powerful rebel before God, wherefore it is said, *Since the Day in which the world was created, there hath been no such man as **Nimrod**, powerful in his hunting, and a rebel before God. And the beginning of his kingdom was Babel the Great.*” The words of the Jeru-

Nebro, son of Chus Æthiops, of the line of Cham, invented hunting, magic, and the astrological and genethliac arts, for the people called Magog or Persians, who affirm that he is now a God and the star Orion; so saith the nameless⁸ chironographer prefixed to John Malalas. The modern Chaldee name of that constellation is Niphla⁹, and the Syriac, Gavoro, quæ gigantem ac strenuum significant; and the Arabic, al Gjebar, is of the same signification. Niphla is clearly

Figure 18. Note Nimrod says He is Orion, but seen with Venus/Sirius.

He is not an historical character but many characters from history are identified with him. The best fit, to our mind, is Naram-Sin, grandson of Sargon-the king of Akkad [37]. Shortly after Naram-Sin the Akkadian kingdom has collapsed due to drought and the date corresponds to the date of Egyptian papyri mentioning drought.

Any increase in the existence probability will not be made due to this singular result, we just used the reference to underline an in the reference given statement: The mother of the Babylonian king Nabonid has written that she has listened the voice of Sin, the head deity. All has been said by Him happened to be true. This means of course, at the least they thought, they had ways to establish contact with deities, via of course magies, even if not controllable.

From human point of view the preference of feminine deities like Isis to the masculine deities like Osiris is understandable, feminines are to offer more love, understanding and material goods. But offering much to humans has a pitfall, virtue may decline:

the rearing of the edifice of human culture. He says, in part: "It appears that all the perfection of civilization, and all the advancement made in philosophy, science, and art among the ancients are due to those institutions which, under the veil of mystery, sought to illustrate the sublimest truths of religion, morality, and virtue, and impress them on the hearts of their disciples.* * * Their chief object was to teach the doctrine of one God, the resurrection of man to eternal life, the dignity of the human soul, and to lead the people to see the shadow of the deity, in the beauty, magnificence, and splendor of the universe."

With the decline of virtue, which has preceded the destruction of every nation of history, the Mysteries became perverted. Sorcery took the place of the divine magic. Indescribable practices (such as the Bacchanalia) were introduced, and perversion ruled supreme; for no institution can be any better than the members of which it is composed. In despair, the few who were true sought to preserve the secret doctrines from oblivion. In some cases they succeeded, but more often the arcanum was lost and only the empty shell of the Mysteries remained.

Figure 19. http://www.istitutocintamani.org/libri/The_secret_teachings_of_all_ages.pdf

Figure 20. Nimrod under Trinity.

In case of Nimrod the choice may have been made on will, since he claims to be Orion but sits under Sirius, preferring him from the trinity, as depicted in Fig. Masonry may have taken its share from this act on the way to be Widow's Son and Son's of Light in the sense Venus=Sirius being both widow and light and they get effected by it. Things forgotten thereby are;

- Too much light may be harmful for human eye, and
- The Patron in command and control will never allow full illumination because of the fact that best tests are made from the center of Gaussian distribution.

Not any offence to Masonry though, because

- the Patron seems to be located in Orion and thus spoke destiny that seems to be planned from Him.
- No Mason can set aside his divine soul even if he establishes contact with evil (in the sense prohibited by the Creator) from higher worlds, with or without good intentions.

3.1.9 Moses

Moses is also not an historical character, he is not to be found among the writings of the Egyptians where he is said to have lived. Remnants from him have been lost if ever existed.

What is said about him in Holy Books seems to a certain extent like a legend. Ipuwer Papyrus is claimed to support the inhalt of the legend in some sources in Internet; for example in [38]. It seems

much more to be a messianic call as given in [39].

Monetheistic religions are generally accepted to begin with Zoroastrianism. Its deity is not omnipotent though He is supposed to be the end-winner. Omnipotence may be introduced with Abrahamic beliefs, and it certainly exists in the remnants of Moses' teachings.

4. The Last Two Millenia

It is said that history is repetition and meanwhile it is forgotten without repetition it would either converge to nothing, or it would go beyond limits; the last one being restricted by the size of our planet. Though the mentioned era is pretty well documented, almost the same things occurred previously have repeated themselves; the water flowing under the bridge is never the same, but water. Figure 21 dated from early 20.th Century may be taken as the symbolic one summarizing all.

Figure 21. <https://ore.exeter.ac.uk/repository/bitstream/handle/10036/2999/BermanR.pdf?sequence=2>

As the figure indicates the history has repeated itself till the beginning of the 20th Century and then all has changed. The visible/observable history is well documented, investigated and assessed. What is not well understood is the influence of the ET powers on this seemingly well known history. Not to forget is that partly allegorical objections like Faust, Dr. Frankenstein, etc. were made and it has been observed that the human ideal has on the way to turned out to be “The Glass Bead Game”, the translation of the title not reflecting the full meaning and implications of the original “Glassperlenspiel”. That the trial tended to a materialistic progress lacking spirit was sensed. Thomas Mann and Hermann Hesse were masons and Goethe was a Rosecrucian as well as a mason. Besides objections based on intuition and sense, scientific investigations and computer simulations were also performed. The Limits to Growth was published and disregarded, Jay Forrester being again a mason. These all imply Masonry as a whole is not to blame in anyway, as in any large group men of any character are among them.

The effect of Sirius the Mother, seemingly trying to offer best and all their wishes to Her children, is obscure. There are rumors regarding this, put into words by Yunus Emre, a 14th Century dervish. It says “Gökten yere iner Zühre, İnsanları çeker mühre.” which means “Sirius comes down to Earth and seals the folk”. This is predicted for pre-doom era.

That there is another and greater hand behind Sirius is also known. That is told in Harname, an allegorical poem written by Şeyhi, a 15th Century head-dervish.

Rumor says Sirius is Lucifer/Shaitan/Shaytan and the Quran says “And that it is He who is the Lord of Sirius.” [40], [41] and [42/53:49]

Masonry seems to be from Heaven revealed and to have gotten impurities on the way; again on wish or permission of Heaven.

Abstract

Following the appointment of its first aristocratic Grand Masters in the 1720s and in the wake of its connections to the scientific Enlightenment, 'Free and Accepted' Masonry rapidly became part of Britain's national profile and the largest and arguably the most influential of Britain's extensive clubs and societies. The new organisation did not evolve naturally from the mediaeval guilds and religious orders that pre-dated it, but was reconfigured radically by a largely self-appointed inner core. Freemasonry became a vehicle for the expression and transmission of the political and religious views of those at its centre, and for the scientific Enlightenment concepts that they championed. The 'Craft' also offered a channel through which many sought to realise personal aspirations: social, intellectual and financial.

Hail Masonry! Thou Craft divine!
Glory of Earth! From Heav'n reveal'd;
Which dost with Jewels precious shine,
From all but Masons Eyes conceal'd.¹⁰²

On a national scale, Freemasonry developed rapidly over a short two decades from its re-launch in the early 1720s to become, as Peter Clark acknowledged, the most prominent of the many eighteenth century fraternal organisations, with a uniquely large provincial network.⁵ It also grew internationally, where it tracked British trade routes and colonial expansion.⁶ The movement was replicated elsewhere, and complementary and sometimes competing Grand Lodges were established in Ireland, Scotland, France, the Netherlands, Sweden, Germany and Russia, where Freemasonry gained a following among the aristocracy, within the military, and among the intellectual and political classes. Aspects of Masonry's moral and philosophical tenets, and its ersatz historical antecedents and Enlightenment substance, had resonance. And both within Britain and, more particularly, within Continental Europe, Masonic lodges created a 'public sphere' for intellectual debate that was elsewhere more circumscribed.⁷ Beaurepaire has commented on academic research into this relational Masonic space within Europe⁸ and noted, in particular, academic work by Margaret Jacob and others that placed 'Masonic lodges ... at the heart of their studies of eighteenth- and nineteenth-century sociability'.⁹

Figure 22. About origins of Freemasonry and its leaks.

5. Auxiliaires

5.1 The Millenium

History seems to have repeated itself, and we are again waiting for a Messiah as Egyptians did. The figure below points this fact to a certain extent out.

“Why is there so much violence in our midst?” René Girard asks. “No question is more debated today. And none produces more disappointing answers.” In Girard’s mimetic theory it is the imitation of someone else’s desire that gives rise to conflict whenever the desired object cannot be shared. This mimetic rivalry, Girard argues, is responsible for the frequency and escalating intensity of human conflict. For Girard, human conflict comes not from the loss of reciprocity between humans but from the transition, imperceptible at first but then ever more rapid, from good to bad reciprocity. In this landmark text, Girard continues his study of violence in light of geopolitical competition, focusing on the roots and outcomes of violence across societies latent in the process of globalization. The volume concludes in a wide-ranging interview with the Sicilian cultural theorist Maria Stella Barberi, where Girard’s twenty-first century emphases on the continuity of all religions, global conflict, and the necessity of apocalyptic thinking emerge.

About the Author

Rene Girard is a member of the French Academy and Emeritus Professor at Stanford University. His books have been translated and acclaimed worldwide. He received the Modern Language Association’s Award for Lifetime Scholarly

Figure 24. Necessities underlined.

5.2 The Evaluation of Ancient Predictions

Almost all religious beliefs contain eschatological contents and related predictions; this may be due to the fact that they otherwise would not be regarded. So we may say if religion then eschatology but it should not be otherwise. If the relation is “if and only if”, then we need to pay real attention.

The subject is pretty diverse, it is not easy to come up with an executive summary out of it and we only give one reference [43].

Our decision is that we need to pay attention.

5.1.3 Possible Realization of the Doom and its Reason

The fact that we seem to keep going on the path of the ancient predictions reminds us of the question of the possibility of a recent doom. This seems to be quite possible since we live on a planet whose inside view is simulated in Figure 25.

Figure 25. Simulation of Magma.

According to the Quran the doom is to expect after/during;

75:7 So when the vision is dazzled,

75:8 And the moon darkens,

75:9 And the sun and the moon joined.

These verses seem to indicate a supernova explosion and events thereafter. Surprisingly these are highly correlated with Hopi predictions regarding Betelgeuse which is expected to be a supernova. Since Hopies seem to have migrated around 10500 B.C., this correlation with Quran of about 600 A.C. Is quite interesting and increase probability of possibility.

In addition islamic belief is that the doom will happen as the Sun goes down in Makkah. At that time the Sun will just be over the Mid-Atlantic-Ridge and in case of an eclipse the magma will get attracted to the ridge. If that happens after a certain time after the darkening of the Moon due to a second sun on the sky, heavy and swift elementary particles like neutrons are to be expected to enter the magma. That may cause an explosion and the Earth may happen to be a rocket, going out of its orbit around the Sun and taking its way to Orion thereafter. This is exactly what the holy books predict, under our previously stated thoughts, since our DNAs are needed for resurrection by not all the way omnipotent deity.

Alan Weisman says “Well, I’m neither a scientist nor a fortune teller, but there’s one scenario I could see in which that could possibly happen.” [44]. It may well happen in a way described above.

6. Conclusion and Suggestion

Cosidering all the evidences together we conclude that we may, with a very high probability, be created by a quasi-omnipotent Creator located in Orion.

His power is so great that He appearingly foreknows the date of Betelguse going supernova about 4 billions years ago, and he can control us correspondingly.

Ex-nihilo creation is excluded.

Regarding our suggestions, we have published them in [3].
